## 4. Chapter: Week 3 Social Psych

### 1. Week 3 Social Psych Questions

#### 4.1.1. According to Steiner's model of group performance, which of the fol...

Author: Yacoub Jayoghli

According to Steiner's model of group performance, which of the following is FALSE?

Please choose only one answer:

- Group performance can never exceed the potential set by group members.
- Group may perform worse than its potential due to coordination losses.
- There is an element of social loafing in motivation losses in group settings.
- A group can create synergies among its members, and perform better than the best of its members

Author: Yacoub Jayoghli

Which of the following is FALSE about the Asch-type conformity situation?

Please choose only one answer:

- University students showed a lower level of conformity than non-students
- Japanese students showed a higher conformity rate when the pressure came from other students in the same sports club.
- Korean advertisements emphasise conformity more than American advertisements.
- The conformity rate is higher in individualist cultures than in collectivist culture

#### 4.1.4. Which of the following is FALSE about Asch's conformity studies?

Author: Yacoub Jayoghli

Which of the following is FALSE about Asch's conformity studies?

Please choose only one answer:

- A naive participant was asked to make a judgement about line lengths after some confederates made judgements in public.
- Approximately 25% of the participants never conformed
- The rate of conformity kept rising as the number of confederates who made the wrong judgements increased up to six.
- Even when a number of confederates gave an erroneous judgement, if there was one person who gave the right judgement, this reduced the rate of conformity.

#### 4.1.5. Which of the following is TRUE?

Author: Yacoub Jayoghli

Which of the following is TRUE?

Please choose only one answer:

- According to Moscovici, in order to influence others, an opinion minority should use a tactic that differs from those used by an opinion majority.
- The blue-green experiment showed that an opinion minority that expressed their opinion consistently could influence a majority's opinion.
- Consistent minorities can affect privately held opinions especially when they are indirectly related to the minority opinions.
- All of the above are TRUE.

Author: Yacoub Jayoghli

According to Moreland and Levine, most groups undergo dynamic changes as some people join the group and others leave it. Which of the following is FALSE about this process?

Please choose only one answer:

- Their model of group dynamics is applicable to all groups.
- The investigation phase is usually followed the socialisation phase.
- In the maintenance phase, members engage in role negotiation.
- Those group members who were led to believe that the other group members of the group have been meeting before (i.e. experimental participants) increased their commitment to the group.

#### 4.1.7. Which of the following is TRUE?

Author: Yacoub Jayoghli

Which of the following is TRUE?

Please choose only one answer:

- Group polarisation refers to groups' tendency to make a more risky decision.
- When confronted by an out-group view that is riskier, an in-group tends to become more risky.
- Group polarisation may occur in part because group members change their opinions in line with other group members' opinions.
- People are more likely to discuss information that is unshared with others in group discussions.

#### 4.1.8. Which of the following is FALSE about group-think?

Author: Yacoub Jayoghli

Which of the following is FALSE about group-think?

Please choose only one answer:

- It is a mode of thinking in which the desire to reach unanimous agreement overrides the motivation to adopt proper rational decision-making procedures.
- There is no evidence that political considerations play a role in faulty decision making.
- There is evidence that a strong leader and a high level of conformity tend to be present when groups exhibit group think.
- Even successful groups showed some indicators of group think.

Author: Yacoub Jayoghli

Which of the following statements is true about transactional and transformation leaderships?

Please choose only one answer:

- Transactional leadership is not effective.
- Transactional leadership is based on individualised consideration and contingent reward.
- Transactional leadership involves providing one's followers with inspiration, and persuading them to rise above their own self-interests to achieve the leader's vision.
- All of the above are true.

Author: Yacoub Jayoghli

Which of the following is TRUE about Milgram's experiments about electric shocks?

Please choose only one answer:

- Approximately 30% of the participants administered the maximum shock (450 V) to a learner.
- Reducing the level of legitimacy of the authority can reduce the level of obedience.
- Participants obeyed even more when the authority was not physically present.
- A recent study has shown a significant reduction in obedience since Milgram's original experiment

#### 4.1.11. Which of the following is FALSE about collective behaviour?

Author: Yacoub Jayoghli

Which of the following is FALSE about collective behaviour?

Please choose only one answer:

- Le Bon argued that a person in a crowd is "a creature acting by instinct"
- Deindividuation is a weaker sense of, or a decreased focus on, personal identity.
- Research suggests that deindividuation consistently results in aggression.
- Social identity theory suggests that deindividuation strengthens group members' tendency to adhere to their groups' situational norms.

#### 4.1.12. Which of the following is TRUE about the Robbers Cave Experiment?

Author: Yacoub Jayoghli

Which of the following is TRUE about the Robbers Cave Experiment?

Please choose only one answer:

- The boys who participated in the experiment had no psychological problems before they participated in the experiment.
- Boys were more likely to choose their in-group members as friends than out-group members.
- Cooperation between the groups to work towards a goal that cannot be achieved by each group alone reduced intergroup conflict.
- All of the above are TRUE.

#### 4.1.13. Which of the following is TRUE about prejudice and discrimination?

Author: Yacoub Jayoghli

Which of the following is TRUE about prejudice and discrimination?

Please choose only one answer:

- Allport argued that extermination is the most extreme form of discrimination.
- Aversive racism is attitudes toward members of a racial group that incorporate both egalitarian social values and negative emotions, causing one to avoid interaction with members of the group.
- People who score high on rightwing authoritarianism tend to show stronger prejudice against outgroups.
- All of the above are true.

Author: Yacoub Jayoghli

Which of the following is FALSE about the intergroup contact hypothesis?

Please choose only one answer:

- Intergroup contact always reduces stereotypes and prejudice.
- For intergroup contact to reduce stereotypes and prejudice, the situation in which groups contact each other should emphasise equal status.
- Intergroup contact needs to be sufficiently frequent and long lasting for it to be effective.
- The evidence for the effectiveness of real-life intergroup contact in the United States in the 1980s has been somewhat mixed.

Author: Yacoub Jayoghli

Which of the following is TRUE about strategies to reduce stereotypes and prejudice?

Please choose only one answer:

- The decategorisation strategy encourages people to personalise a member of an outgroup.
- The salient categorisation strategy encourages people to generalise positive experiences with a typical member of a negatively stereotyped group.
- The recategorisation strategy encourages people to categorise their ingroup and outgroup into a more inclusive social category.
- All of the above are TRUE and these strategies have been found to reduce prejudice and stereotypes to some extent under certain circumstances; however, there are some potential problems associated with each of them.
